MB-CONN01

Micro:Bit prototype breakout board V2 with breadboard

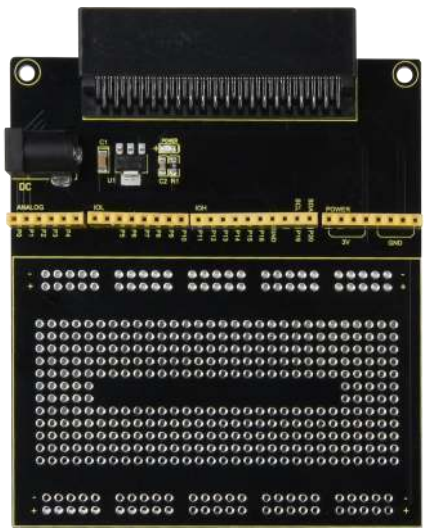

This breakout board makes all contacts of the Micro:Bit easily accessible as a pin socket. In addition, it has a regulated power supply, which makes it possible to operate the breakout board with 5-9V.
With the supplied breadboard this breakout board for Micro:Bit is especially well suited to build test or experiment circuits on it.
On the freely wireable solder veroboard in the lower half of the board components or whole projects can be soldered for longer use.

MAIN FEATURES	
Board	Veroboard as breakout-board for Micro:Bit
Special features	all pins of the Micro:Bit available as pin socket, power indicator LED, bread-board with 400 contacts
Application areas	Micro:Bit test and experi-ment circuits
Compatible with	Micro:Bit
Dimensions	86 x 105 mm
Items delivered	MB-CONN01, Breadboard

FURTHER SPECIFICATIONS	
Voltage supply	5 - 9 V
Output voltage	3.3 V
