Projector Ceiling Mount PJ02UCMPF

Universal Ceiling Mount for Vertical & Portrait Projection

The prevalence of laser projection is making it easier to get creative with projection applications, including interactive floor and portrait projection installations.

The PJ02UCMPF projector mount (black and white version) gives installers the flexibility to quickly and securely mount the projector to deliver these unique applications.

With the PJ02UCMPF mount projectors can be positioned in multiple orientations addressing the needs of popular vertical and portrait digital signage applications. This is the perfect mounting solution for projectors that are equipped with multi-directional capabilities.

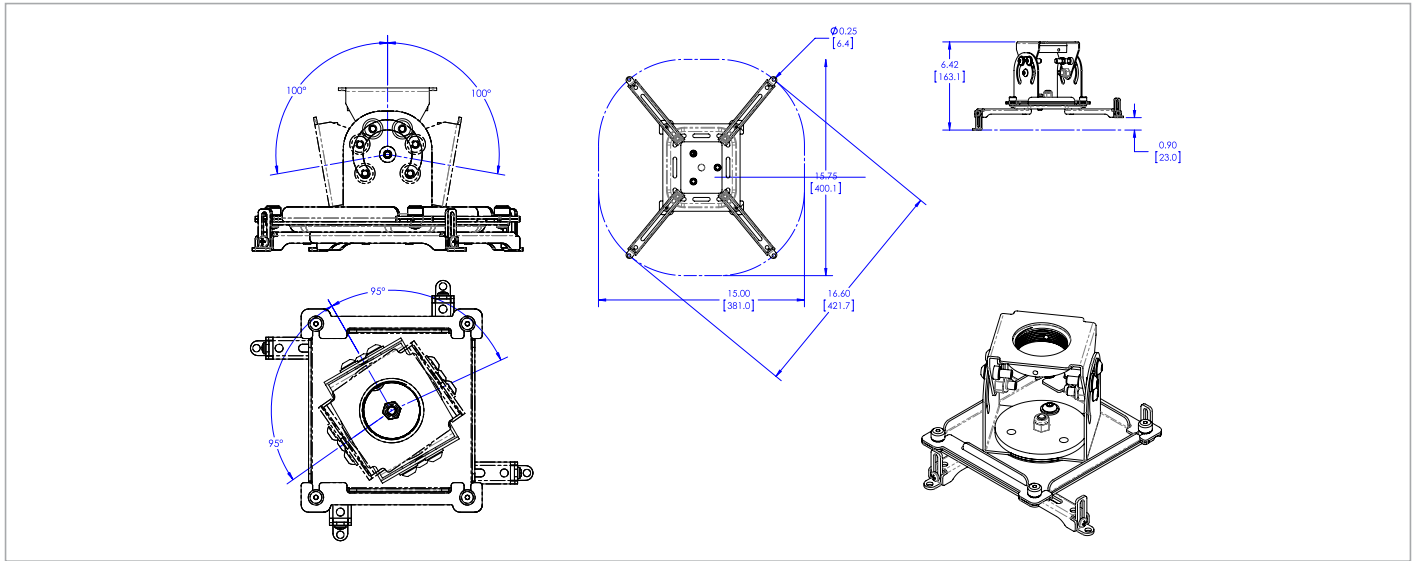

PJ02UCMPF with PX803UL Projector

Delivering Genuine Benefits

- **Make your ideas happen** – implement your creative ideas making use of independent roll, pitch and yaw for quick and precise projector configuration
- **Reduce maintenance effort** – quickly connect / disconnect the projector for easy installation and servicing
- **Maintain pre-set settings** – preserve original adjustments when disconnected, whilst the solid steel construction reduces flex
- **Universal projector interface** – universal interface brackets for up to 6 projector attachment points
- **Extension Columns** – Extension column in different length are available to ensure maximum flexibility
