

HA BDH Series

Ceiling mount for projectors

The HA BDH series are universal projector mounts for a ceiling installation.

Thanks to the variable-length mounting arms, the ceiling mount is suitable for almost all commercially available projector models.

The precise setting options in the X and Y axes allow it; to adjust the alignment to the projection surface at any time, even after installation.

In addition to the fixed or variably adjustable ceiling height, depending on the version, the projector can be installed quickly and conveniently.

The ceiling mount can be tilted $\pm 45^\circ$, which enables installation on sloping ceilings.

The cables are routed internally and protected against unauthorized access.

The surfaces are finished with an impact- and scratch-resistant powder coating in white.

The max. load is 25 kg.

The HA BDH series currently comprises 4 versions, 3 of which can be continuously telescoped to the desired length via tools.

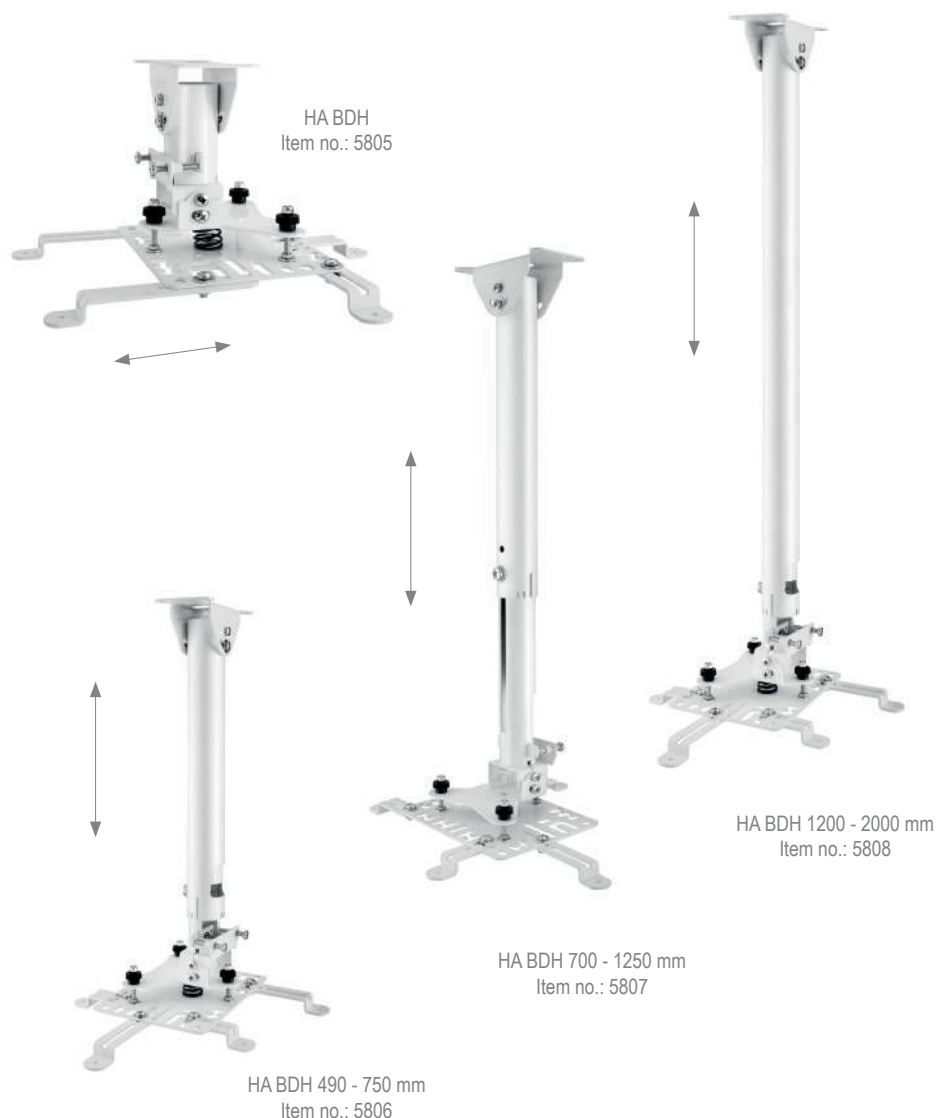

continuous telescopic on the desired length (tool needed)
