FLEXIPOLE PLUS MOUNTING SOLUTION

NEW AND IMPROVED, SECURE AND FLEXIBLE

Following the success of Tailwind's FlexiPole Complete, the next generation is now available to support new devices with upgraded features, enhanced durability and an updated look and feel. The FlexiPole™ Plus from ENS is a versatile pole mount system with device-specific back plates compatible with all leading payment devices, including Ingenico, Verifone, PAX and many others. Security is designed into FlexiPole Plus through a unique latching system which securely holds the device in place. Simply select the back plate for your device and choose between Quick Release, Lockable or Tethered security options.

The FlexiPole Plus is easy to install and can accommodate cables with large, hard-wired connectors so they can be neatly and safely routed.

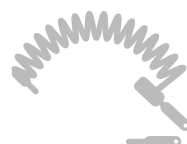

- ✓ Protect your payment device from damage, theft and criminal interference, increasing up-time
- ✓ Future proof - if you change your PIN Pad, you only need a new back plate- no need to change the stand
- ✓ Quick Release, Locking or Tethered options for further security
- ✓ Helps you to comply with accessibility/disability regulations and PCI DSS/P2PE security requirements
- ✓ The stand is exceptionally strong and durable, yet lightweight for shipping

FLEXiPOLE POS MOUNTS

FLEXIGRIP UNIVERSAL PAYMENT TERMINAL MOUNT

A universal mounting solution, FlexiGrip can support a wide range of card payment terminals and is ideal for retailers who may wish to change their payment technology frequently and maintain their independence in terms of their choice of payment terminal.

Adjustable arms hold the payment terminal in place with high friction foam grippers that can accommodate devices between 6.5 cm to 11.5 cm wide.

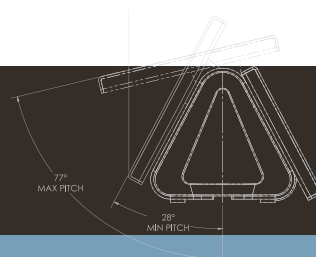

- ✓ Adjustable to accommodate a wide range of payment terminal types
- ✓ Protects your investment by protecting your PIN Pad and cables from damage, theft and criminal interference
- ✓ Helps you to comply with accessibility/disability regulations and PCI DSS/P2PE security requirements

FLEXIGRIP MINI

UNIVERSAL PAYMENT MOUNTING SOLUTION

The FlexiGrip Mini from ENS Group is a universal payment mounting solution compatible with a wide range of payment terminals. Available in Compact, Complete and Contour variations, the FlexiGrip Mini is the ideal solution for retailers who may wish to change their payment technology frequently and maintain their independence in terms of their choice of payment terminal.

Adjustable arms hold the payment terminal securely in place with high friction foam grippers. Easy one-handed release makes this an ideal solution for small mPOS devices.

- ✓ Ideal for mobile point of sale applications - easily remove device from stand with one hand
- ✓ Adjustable to accommodate a wide range of payment terminal types
- ✓ Seamless, sleek design and minimal footprint help to create an organised and modern-looking checkout environment
- ✓ Protects your investment by protecting your PINPad and cables from damage, theft and criminal interference
- ✓ Optional UV Clean (UV-PT+) attachment for 24/7 safe and automated disinfection of payment device

VERIFONE E285 PROTECT & CHARGE

THE NEWEST ADDITION TO THE ENS MOBILE PROTECT FAMILY

Designed specifically for the Verifone e285, Protect & Charge provides an extra layer of defence from drops, is easy to install, and comes standard with access to the lanyard eyelet and an included belt clip accessory. The Verifone e285 Protect & Charge case can accommodate cable input and the optional single or five bar charging base. The charging base utilises the built-in rail system on the Verifone e285 Protect & Charge Case that allows the user to intuitively guide the device into the charger with a single motion. No more fumbling trying to find the right cable and locating the power port on the device. The Verifone e285 Protect & Charge base provides a simple and easy way to store and charge the Verifone e285.

KEY FEATURES

- ✓ Unhindered access to all functions on the payment device including charging and data ports, buttons and cameras
- ✓ Case provides an extra layer of protection against drops
- ✓ Tactile elastomer corners and edges for an improved performance and grip experience
- ✓ Single and 5-bay charging options available (single bay can be secured to a counter or wall)
- ✓ All payment methods (EMV, MSR, Contactless) remain functional when e285 is docked
- ✓ Exclusive rail system for easy and reliable charging
- ✓ Standard belt clip and lanyard options available (belt clip accessory included in box)

MOBILE PAYMENT SLED

PAIRS WITH ZEBRA TC5X
WITH INGENICO LINK/2500i

The ENS Mobile Payment Sled for the Zebra TC5X and Ingenico Link/2500i is our newest, thinnest, most exciting mobile solution.

Our solution physically and electronically pairs a Zebra TC5X with a Ingenico Link/2500i, removing reliance on Bluetooth or WiFi for communication. It delivers a single solution that allows retailers to scan, stock check and order via the Zebra device while accepting payments and completing the sale through the Ingenico device.

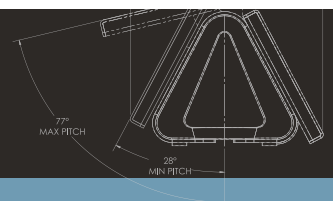

- ✓ Wired communication between devices
- ✓ Rugged, zero depth design
- ✓ Fully integrated electronics
- ✓ Simultaneous charging via USB-C port
- ✓ Utilizes Zebra TC5X with rugged boot
- ✓ Access to all Ingenico and Zebra device features

CHARGING & COMMS STANDS FOR INGENICO iSMP4

MERGING MOBILE TECHNOLOGY WITH SECURE CHARGING STAND

With many retailers using neat mPOS devices for fixed as well as mobile use, ENS charge and comms stands ensure the device is always ready to go and gives retailer the option to use fixed communications as an alternative to the Bluetooth/WiFi capabilities of the payment device.

Supporting Ingenico's iSMP4 mPOS PINPad, ENS stands include a neat, fixed angle version as well as stands that offer tilt and swivel. Both options use the same smart engagement mechanism to guide the device onto the stand and into the charging position.

When associates need to go mobile, the device can be removed quickly and easily. For installations that require the device to be secured and not used as a mobile device, a simple security screw ensures the device is locked in place.

- ✓ Integrated charging and communication
- ✓ Easy release for mobile use
- ✓ Ability to secure device to stand for fixed use
- ✓ Various mounting options
- ✓ Easy Installation - mount with either screws or a glue pad
- ✓ PCI and ADA compliant

MODULAR MOUNT

MM-1000 SERIES

The challenge for retailers, warehouses and distribution centers when implementing technology is how to maximize limited space to mount that technology, while ensuring it is ergonomic and easy to use. Installed modular mounting solutions are regularly upgraded to utilize new technology, however the user often has no choice on where they can source this upgrade.

The exciting news is that the new MM-1000 Modular Mounting solution from ENS Group gives the user complete solution options to manage the space at their checkout or workstation and also to upgrade existing installations.

The MM-1000 Modular Mount incorporates a new generation of engineered materials for a durable & strong, yet modern looking POS solution. Designed to be great value, easy to order, install & upgrade.

MM-1000 FEATURES

- ✓ Uses the latest Engineered Polyamide Alloy materials for durability and industry leading design for today's markets
- ✓ Innovative cable management that is an industry first to hide and protect cables
- ✓ Offers a cost-effective solution for upgrading existing Pole based POS systems and workstations
- ✓ The ENS Pole allows full range of Device Installation heights on all four sides!
- ✓ Tool-less tilt tensions adjustments on your Payment Terminal Mount
- ✓ Product Configurator to easily order exactly what you need

MODULAR MOUNT

WHAT VALUE DOES MM-1000 BRING?

Innovation

Modular Design
Integrates and meets industry-standards (VESA, 45mm Pole).
Industry leading design.
Innovative cable management.

Quality

Made using the latest high quality materials.
Developed by ENS Engineers in collaboration with key retailers and technology partners.
Wide range of support materials available.

Ease of Doing Business

Easy to order using Product Configurator and easy to assemble on-site.
Makes best use of valuable counter space.
Helps to achieve PCI compliance.
Prevent damage, theft and substitution and prolong life of devices and cables.
Enhances user experience.

Flexibility

Modular Design provides huge choice and configurability.
Easily switch to new technology.
Customise to individual requirements.
Suitable for use across a wide range of industries.

Cost Savings & Opportunities

The ENS Pole allows more devices to be attached now or in the future.
Easily switch to new technology without changing whole solution.
Scalable solution.
Competitively priced with versatility to achieve mass customization

TECHTOWER TELESCOPING MONITOR MOUNT

FOR VESA MONITORS

367-5617

Designed using our TechTower Pole with double pivot, this new offering from ENS Group provides easy adjust vertical, tilt and side to side rotation of your POS AIO or Display Monitor. With cable strain relief built in and 'through the pole' cable routing, this mount looks as clean as it is durable. Cables can exit the Pole near the bottom or through your counter-top.

The telescoping vertical lift feature allows the center of your Monitor to be positioned between 20.8" and 26.3" from the mounting surface.

- ✓ 5.5" of vertical monitor adjustment
- ✓ 180 degrees left-to-right monitor rotation
- ✓ 50 degree upward and 10 degree downward Monitor tilt
- ✓ Easy attach Monitor feature on VESA plate
- ✓ Holds monitors weighing up to 20 lbs.
- ✓ Integrated and protected cable management
- ✓ Additional device mounting options back of clamp

EASY HEIGHT ADJUSTMENT:

1. Release Latch

2. Adjust Height

3. Engage Latch

HP SELF CHECK-OUT

NEW WALL MOUNTED SELF CHECK-OUT FOR HP ENGAGE ONE PRO

Designed and manufactured by ENS Group in collaboration with HP, this all-new wall mounted self check-out provides a sleek, durable and efficient self-service solution. Suitable for use across a range of industries, the HP SCO is ideal for queue-busting and with its compact design helps to make best use of valuable space and to create an organised and streamlined retail environment.

KEY FEATURES

- ✓ Ideal solution for self-service applications across a range of industries
- ✓ Features HP Engage One Printer and Datalogic 1500i Scanner - both easily accessed via front of solution
- ✓ Protects your investment by protecting technology and cables from damage, theft and criminal interference
- ✓ Compatible with any payment terminal - choose from quick release, locking and tethered mounting options
- ✓ Screen tilts 15° for optimum user experience
- ✓ Optional light attachment to alert staff if customer needs attention
- ✓ Easily add UV Clean for 24/7 rapid, safe and automated disinfection of touchscreen and PINPad

FLEXIPOLE TAB

FLEXIBLE TABLET MOUNTING SOLUTIONS FROM ENS

This simple solution to tablet mounting from ENS gives users flexibility to mount any tablet type – iOS, Android or Windows, on a counter top or wall mount. Decide at the point of installation whether your tablet needs to be in portrait or landscape and simply fit the universal backplate to the tablet using our high bond adhesive pad. This can be used either directly on the tablet or attached to a tablet case.

Once the universal backplate is attached, the tablet can click into place on any of our FlexiPole stands allowing full access to the tablet features. Stand options include countertop, compact countertop and wall mount. Each of these can be quick release allowing users to go mobile easily. Alternatively, the stands can lock the tablet in place for a more secure solution.

Once mounted, the tilt and swivel features of the FlexiPole stands* allow the tablet to be easily adjusted to face the customer or the associate.

- ✓ Any tablet type/size
- ✓ Mount in portrait or landscape
- ✓ Quick release or locking
- ✓ Counter or wall mounted
- ✓ Optional weighed base as an alternative to fixing to the counter
- ✓ Automated UV-C disinfection can be added to all configurations

COUNTERTOP

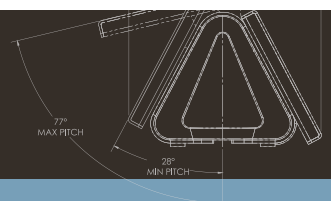

WALL MOUNT

COMPACT COUNTERTOP

*Compact stands offers only tilt, no swivel.

Get in Touch >

In the current climate, tablets can be a great tool to reduce face to face interaction, but these high-touch surfaces can also play host to high counts of potentially harmful micro-organisms. ENS have developed a market leading, automated disinfecting solution using UV-C light. UV-Clean can be added to your tablet stand solution to ensure the surface is free from bacteria and viruses such as Coronavirus.

The flexibility of this solution depends on the way the stand is installed and used. Countertop stands can be mounted to the counter with either a high bond adhesive pad (included) or with screws. If the stand needs to be moved around, ENS offer a weighted base so that the stand is stable but can also be moved to different locations

HP ENGAGE ONE GENESIS STAND

ENHANCING CUSTOMER EXPERIENCE AND
INCREASING HP ENGAGE ONE VERSATILITY

The HP Engage One is a Point of Sale device with integrated processor unit & 14" touchscreen ideal for use in retail & hospitality.

ENS have developed the Genesis range of stands to increase ergonomics with screen tilt and rotation with various mounting options.

The Genesis stands are designed to allow the Engage One to be installed where counterspace is limited and where additional devices, such as an extra back-to-back monitor, are required.

- ✓ 160° tilt* and 300° rotation for optimum screen angle
- ✓ Cable management for the HP Engage One for easy maintenance and quick installation
- ✓ Can attach to the HP Connection Hub to build an All-in-One POS solution, ideal where space is limited
- ✓ Can be fitted with an extra monitor to create a back-to-back configuration. The extra screen can be used for marketing, branding and other information for the customer
- ✓ Comes with a variety of mounting options for extra flexibility, including payment terminal integration
- ✓ Colour options to match retailers' branding and store environment

HP ENGAGE GO WALL MOUNT

ENHANCING CUSTOMER EXPERIENCE AND INCREASING HP ENGAGE GO VERSATILITY

The HP Engage Go Wall Mount creates an interactive wall mount and VESA mount system encompassing the HP Engage Go. It allows docking and releasing of tablet for use in an array of environments, including POS and mPOS.

The HP Engage Go Wall Mount has simplistic design features, making the tablet the first-read of the system. The accessible and illuminated touch point makes it easy to release tablet from it's dock.

- ✓ VESA mounted or wall mounted
- ✓ Illuminated release button allows for easy removal of the device
- ✓ Provides mobility for line-busting or inventory management
- ✓ Coordinated construction process with integrations into HP systems
- ✓ Multilevel security

TECH SPEC PART NUMNER: 367-5125

Designed for HP Engage Go

Integrated / Ergonomic / Versatile

H: 8.16" W: 2.61" L: 5.10"

Package dimensions: 5-1/2" x 4" x 8-3/8"

Package weight: 2.5 lbs

UV-Clean Payment Terminal (UV24-PT+)

Safely Disinfect Payment Terminals on Stands

UV-C light is used to eradicate harmful bacteria, including antibiotic resistant viruses (including Coronaviruses SARS and MERS), Staphylococcus aureus (MRSA) and Enterococcus (VRE), as well as E. coli, difficile, Proteus spp., Klebsiella spp and Listeria spp. UV-C light has also been shown to be successful against the COVID-19 strain.

Given that there are over 8 million payment terminal stands in US and credit cards continue to be the primary form of payment, the UV24-PT+ is a game-changing solution designed to mount to your on-site payment stand. 24/7 automated disinfecting cycles of low doses of UV-C light are harmful to pathogens, but safe for your employees and customers. UV-C light is also safe for extended use on payment terminals.

Liquid disinfectants and harsh chemicals can damage payment devices, and overlays will nullify PCI compliance.
<https://blog.pcisecuritystandards.org/maintaining-pos-device-security-and-cleanliness>

WHY UV-PT

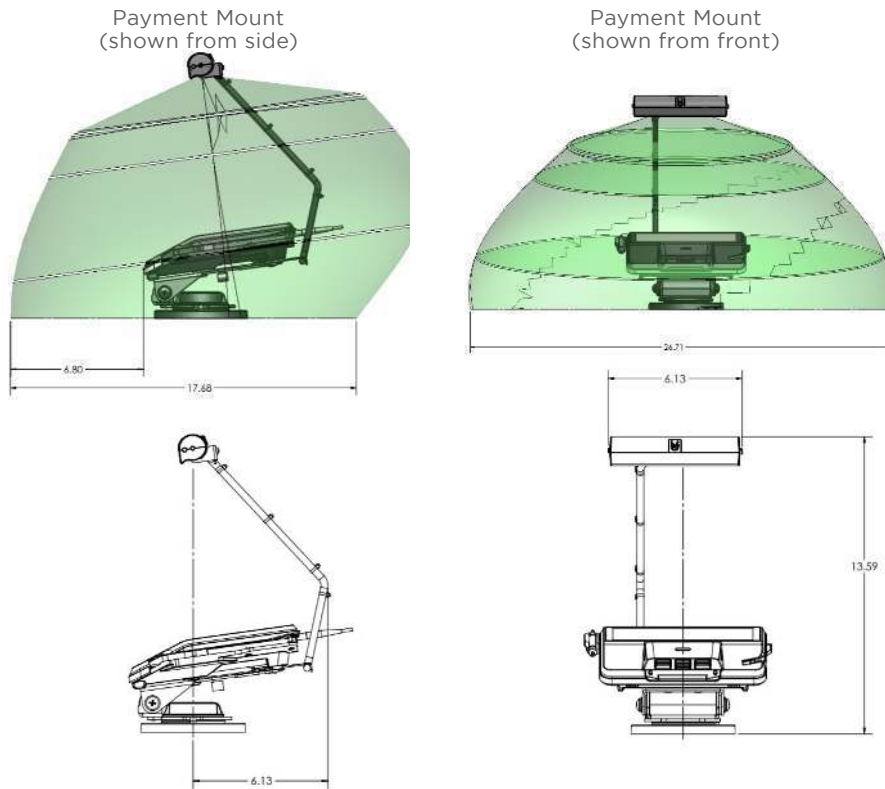

- 24/7 Continuous Disinfecting
- Eradicates 99.9% of viruses and bacteria
- Doesn't damage or compromise device
- Easy field installation
- Works with most existing stands
- Works with the leading terminal manufactures
- No integration needed to your current POS software
- Maintains PCI compliance

UV-Clean Payment Terminal (UV24-PT+)

Safely Disinfect Payment Terminals on Stands

COVERAGE AREA

Safe, Flexible, Next-Generation High Touch Surface Disinfectant

With UV-Clean, you can set up a strong line of defense against the spread of infectious microorganisms on high-touch surfaces or objects. Lead the Change, create the safest environments for your employees, customers and community.

PRODUCT DETAILS

- Product number: Device Dependent
- Compatible with most major payment devices
- Automated disinfecting cycle
- Motion activated for safe deployment of UV-C light
- Package dimensions: approx. 6" x 8" x 12" (device/product dependent)
- Package weight: approx. 2.5 lbs
- One-year warranty
- Extended Warranty options available

MATERIAL OVERVIEW

- 100% recyclable UV stable plastic
- UV-C bulb
- 10' long 5.5mm pin to USB power cable
- Power adapter included

KEY FEATURES

- Attaches to most ENS and Tailwind payment stands with retail hardened brackets
- Maintains PCI compliance
- Optimizes day-to-day workflow with an automatic means of self-disinfection
- Low cost of ownership

The MET Mark for product safety indicates compliance to required standards by virtue of Eurofins MET Labs' equivalent NRTL accreditations to UL.

UV-Clean Stand Alone (UV24-SA+)

Safely Disinfect High Touch Devices

UV-C light is used to eradicate harmful bacteria, including antibiotic resistant viruses (including Coronaviruses SARS and MERS), Staphylococcus aureus (MRSA) and Enterococcus (VRE), as well as E. coli, difficile, Proteus spp., Klebsiella spp and Listeria spp. UV-C light is being used globally to fight the COVID-19 strain. Our automated chemical-free disinfecting technology is your proven ally against the spread of infectious microorganisms.

The UV24-SA+ unit is designed to provide a quick and easy way to disinfect devices like small portable tablets, mPOS devices and handheld scanners. With high touch items such as these, regular cleaning with low doses of UV-C light will help to eliminate the transfer of harmful pathogens while being safe for you. Requiring minimal assembly, the unit is comprised of a steel tray, head unit and stand. Simply place your mobile devices in the steel tray and walk away for the cleaning cycle to begin. Good hand hygiene is always recommended for optimal device disinfection.

How Does It Work?

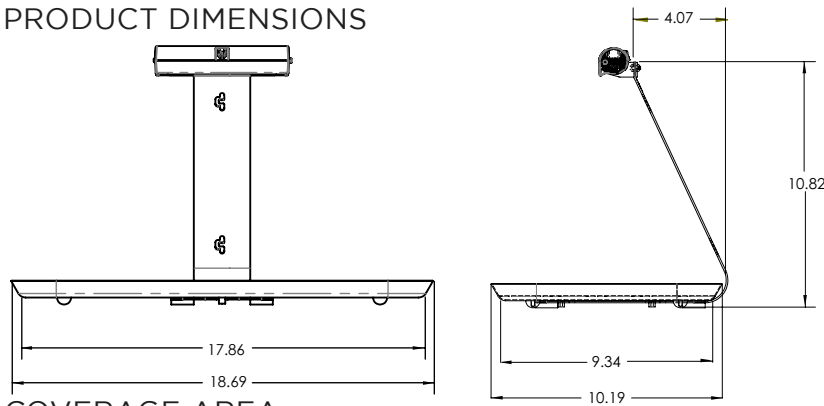

- Germicidal UV-C light is dispensed at low levels
- Microorganisms absorb the UV-C wavelength
- DNA of infection-causing pathogens are broken
- Pathogens are disabled, stopping them from reproducing and spreading

UV-Clean Stand Alone (UV24-SA+)

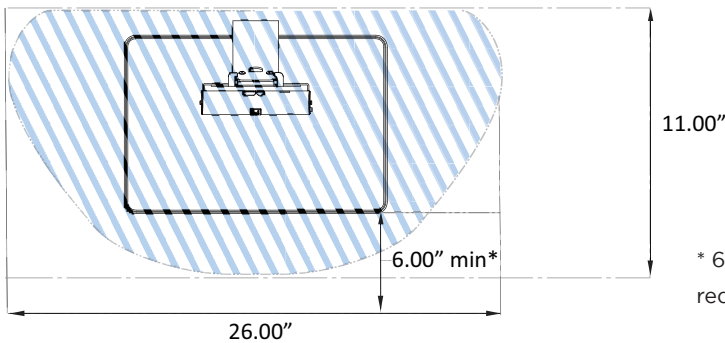

Safely Disinfect High Touch Devices

PRODUCT DIMENSIONS

COVERAGE AREA

(shown from above)

* 6.00" minimum distance from front of counter to tray reduces unintended UV-C shut-off caused by foot traffic

Safe, Flexible, Next-Generation High Touch Surface

With UV-Clean, you can set up a strong line of defense against the spread of infectious microorganisms on high-touch surfaces or objects. Lead the Change, create the safest environments for your employees, customers and community.

PRODUCT DETAILS

- 367-5472
- Automated disinfecting cycle
- Motion activated for safe deployment of UV-C light
- Independent low energy LED task light
- Package dimensions: 15" L x 11" W x 5" H
- Package weight: 5 lbs
- One-year warranty
- Extended Warranty option available

MATERIAL OVERVIEW

- 100% recyclable UV stable plastic
- UV-C bulb
- 10' long 5.5mm pin to USB power cable
- Power adapter included

KEY FEATURES

- Ideal for smaller items
- Convenient area to place devices for quick, yet effective ultraviolet disinfection
- Cable management to manage power cable
- Optimizes day-to-day workflow with an automatic means of self-disinfection
- Low cost of ownership

LEADING THE CHANGE TO A SAFER GP CLINIC EXPERIENCE

MILLHILL GP SURGERY INSTALLS ENS UV-CLEAN TO ENHANCE COVID-SECURE EXPERIENCE

Pandemic or no pandemic, it is crucial that healthcare providers take effective steps to ensure the utmost levels of sanitation and hygiene in their premises.

Millhill GP Surgery in Dunfermline, Scotland are one such provider taking vital steps to ensure patient and staff safety. The surgery operates a touch-screen patient check-in system so as to streamline the check-in process and decrease the amount of face-to-face interaction between patients and staff. ENS' UV-24 cleaning solution was installed on the practice's patient check-in screen with the primary goal of preventing the spread of bacteria and viruses and thereby reducing the risk of infection for all using the device.

Installed at Millhill, the UV-24 is an attractive and effective solution for a range of touch-screen devices. With motion sensing for the safe, automated deployment of a non-visible UV-C light, the solution inactivates 99.9% of bacteria, viruses and mould at the cellular level. As such, it is an ideal solution for battling not only Covid-19, but also more common ailments such as the flu, norovirus and the common cold.

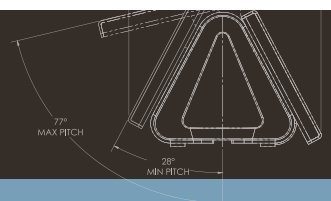

By reducing the need for face-to-face contact with administrative staff, ENS' UV-24 solution has helped to protect both patients and staff at Millhill GP Surgery. According to Millhill's Practice Manager, Susane Hogarth, "patients are happy to use the automated check-in system when advised that it is clean and protected by ENS' UV cleaner". Likewise, when speaking of the solution's benefits, Susane also highlighted the time it has saved staff in terms of cleaning the check-in screen repeatedly throughout the day, despite the pandemic having reduced footfall to the practice. In turn, the use of UV-24 also helps to avoid costly damage which can often be incurred via the manual cleaning of technological devices with traditional disinfecting liquids.

KEY BENEFITS

- ✓ Automated disinfecting cycle
- ✓ Motion activated for safe deployment of UV-C light
- ✓ Independent low energy LED task light
- ✓ 100% recyclable UV stable ABS plastic
- ✓ USB power cable & power adapter included
- ✓ One-year warranty
- ✓ Extended service options available

LEADING THE CHANGE TO A SAFE WORKING, SHOPPING & EATING EXPERIENCE

LOCH LEVEN'S LARDER DEPLOYS ENS UV-CLEAN TO ENHANCE COVID SECURE EXPERIENCE

Loch Leven's Larder is an award-winning, 120 seater restaurant, deli and retail business with idyllic views over the loch and surrounding hills. Adapting the business to be Covid safe for customers & staff was the management priority of summer 2020. Social distancing was encouraged with clear signage and customer flow directions, tables in the restaurant were reduced and screens were installed at the point of purchase for customers.

To ensure all technology was free of bacteria and viruses ENS Group UV Clean solutions were installed in the premises. On the touchscreens in the retail food hall, textile shop, and café the uv24 monitor mounts were installed. This ensures that the touchscreens are cleaned automatically after every transaction by staff members, particularly useful as staff were reporting the screen not responding well to gloved hands or hands still slightly wet with hand sanitiser.

The UV-PT solution for payment terminals is installed to ensure the payment terminal is cleaned automatically after use by every customer.

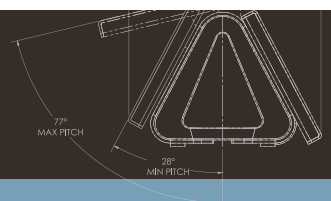

The UV Clean standalone solution ensures that all mobile devices including tablets and mobiles are cleaned after use by staff.

Installation of the UV Clean solutions has ensured virus and bacteria free technology after every use, enabled staff to concentrate on customer service instead of cleaning technology surfaces and eliminated the risk of damage to technology of manual cleaning by disinfection liquids.

UV Clean technology has enabled Loch Leven's Larder to be able to inform customers and staff that use of the instore technology is safe.

LEADING THE CHANGE TO A SAFE WORKING, SHOPPING & EATING EXPERIENCE

UV-CLEAN HELPS THE CLINK RESTAURANT TO BE COVID SECURE

THE CLINK RESTAURANT

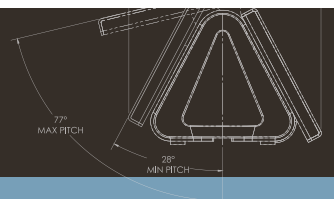

ENS are proud to support The Clink Charity by helping make their training restaurant at HMP Styal, Cheshire safe with our UV-Clean solutions. The Clink is no ordinary restaurant. Its restaurants are situated within working prisons and their food is lovingly prepared and served by prisoners in training to gain their qualifications in order to reduce reoffending rates. The Clink Charity helps change attitudes, transforms lives and creates second chances <https://thelinkcharity.org/>

At The Clink Restaurant in Styal we installed UV Clean solutions to kill 99.9% of viruses and bacteria (including coronavirus) on staff and customer technology touchpoints. The UV-SA standalone solution ensures all payment terminals, mobile communications and tablets are disinfected after use by staff and customers. The UV-MM solution attached to the POS touchscreen automatically disinfects the screen after use by staff members. UV Clean from ENS ensures that staff and customer technology touchpoints are safe to use.

Catrin Aherne General Manager at The Clink Restaurant said:
"We have taken every step to be COVID secure both for our customers and learners including socially distanced tables, one way entry and hygiene processes. UV Clean from ENS is an excellent addition to our goal of COVID security and we are very grateful for their generous support."
