InLine® Compact Desktop KVM Switch USB DVI 2 Port + Audio with Cables 1.2m

* Preise inkl. gesetzlicher MwSt. zzgl.Versandkosten

Marke: INL
Bestell-Nr.: 61602C

2-port USB/DVI/Audio KVM switch with True Transparent, USB emulation and monitor data mirroring incl. 2 x 1.2m PC cables. This 2-port DVI/USB/audio KVM switch has new features that allow you unlimited access to multiple computers and more USB devices/mass storage devices. All driver functions of the keyboard/mouse remain fully intact, even though they are emulated (= remain permanently logged in on both computers). In addition, and this is almost unique, the "really connected" display is permanently emulated to all connected computers (DDC emulation). Properties:

- True Transparent USB (TTU) emulation = emulation with full driver support of keyboard/mouse.
- With TTU emulation you have an extremely high compatibility to all keyboards and mice (also Gaming/CAD).
- The TTU emulation preserves all special functions of the PC's driver software.
- Nevertheless, the keyboard/mouse remain permanently logged on to all computers and react immediately after the switching process.
- The DDC emulation permanently delivers the DDC information to the computers (= up to 1920x1080 pixels to the display) and offers not only the best possible video quality, but also the highest compatibility to all operating systems and graphics cards.
- The DDC emulation and the TTU emulation make it possible to boot at any time "independently" of the KVM switch's switching position -- keyboard/mouse and display always function as if they were directly connected to the PC/notebook.
- Switchable at any time "independent of the computer status" via hotkey (key combination on the keyboard) - without software installation.
- Audio is also switched (can also be switched independently "via hotkey").
- 2 x USB 2.0 is also switched (in addition to keyboard/mouse) (can also be switched "by hotkey" independently)
- The key on the KVM switch gives you direct access to the PC selection as an alternative to hotkey switching.
- Adjustable hot-key trigger key "2 x rolls" = default, also possible: Ctrl "right or left", rolls, caps, Esc, F12, Num.
- Suitable for all current operating systems (from Windows XP, Linux, Mac-OS, Sun-OS, etc.) and various platforms (PC, Notebook, Mac, ...)
- Low power consumption due to ASIC technology
- Dimensions: 154 x 65.5 x 27 mm
- Housing: Plastic / Colour: white / silver
- Content of delivery: German manual, English manual, AD-CP02A KVM switch, 2x 1.2 m long DVI-I/Audio and USB PC cable
