

CS72U/CS74U

2/4-Port USB KVM Switch

- The CS72U / CS74U 2/4-Port USB KVM Switch is a desktop control unit that allows users to access two or four computers from a single KVM console (keyboard and mouse, audio and VGA monitor).

With the CS72U / CS74U, you can access computers conveniently using port selection pushbuttons located on the unit's front panel.

Setup is fast and easy; simply plug cables into their appropriate ports. There is no software to configure, no installation routines, and no incompatibility problems. Since the CS72U / CS74U intercepts keyboard input directly, it will work on multiple computing platforms.
