ASSORTMENT 2019

Add new energy to your garden

ROBOTICS | 24-82V | COMPRESSORS | CORDED | PRESSURE WASHERS | GRASS SHEARS

ONE BATTERY FOR ALL YOUR TOOLS

With Greenworks your possibilities are endless. Enjoy the work.

Greenworks is a fresh, rapidly growing brand selling innovative battery products designed to make gardening more enjoyable. You get zero fumes, low maintenance, no hassle. Just clean, strong battery power. Our products are versatile, easy to use and better for the environment.

Convenient

Greenworks has unusually strong voltage ranges, from 24V up to 82V. You can drill a hole in the wall, cut down a tree in the garden, or mow an entire city park. Your choice.

Simple

Greenworks equipment is designed to be lightweight, super easy and enjoyable to use. Charge one battery while using the other and keep going.

Smart

Switch to Greenworks and get zero fumes. Just great tools for today's fans of gardening and DIY. Enjoy.

DigiPro brushless motors

Old technology like petrol engines reach up to 15% energy efficiency (the rest is wasted on heat generation). Modern battery powered motors are totally different. We normally use DigiPro brushless motors that reach a stellar 90% energy efficiency, and brushed motors that reach 75% energy efficiency for some of our products. Welcome to the future.

greenworks®

Batteries are the future, and some are more powerful than others.

At Greenworks we have been developing battery powered equipment from day one. 18V is the industry standard. But we don't do standard. Our equipment delivers true performance in every voltage range – from 24V to 82V.

One battery for all your tools

Use the same battery for all equipment in the same voltage range.

Two batteries makes you unstoppable

Charge one while you use the other.

Strong, stronger, strongest

Our equipment comes in 24V, 40V, 60V, 80V, 82V and robotics.

Developed together

A battery powered device is only as good as its motor. So we develop the motor and battery together for optimum results.

It's easier with a battery

1. Ready to start
2. Low noise and low vibration
3. Low weight
4. Low running cost
5. Low maintenance
6. No direct emissions
7. Energy efficient
8. Better for the environment

LITHIUM-ION RECHARGEABLE BATTERIES

- Always get the power you expect
- Always get maximum energy capacity
- Rapidly charge one battery while you use the other

Be in charge of your garden. Easy!

ONE BATTERY FOR ALL YOUR TOOLS

24 VOLT LITHIUM | 40 VOLT LITHIUM MAX | 60 VOLT LITHIUM MAX | 80 VOLT LITHIUM MAX | 82 VOLT LITHIUM MAX

Strong power ranges, from 24 volt to 82 volt. Use the same Lithium-Ion battery for all equipment in the same voltage range.

Robotic mowers

Our definition of simple. Optimow

Getting started with robotic mowing has never been easier! Equipped with the latest technology for perfect results plus ingenious functions for easy installation and operation. The new Optimow – made to make your life easier.

Optimow is extremely durable and packed with all the smart features you need for perfect results and easy operation. Once you've set it up, you simply control your Optimow wherever you are with the GreenGuide app – while your robotic mower mows the lawn intelligently and quietly at home. The razor-sharp mowing deck delivers exceptional results.

Made for an easy start – and lasting satisfaction!

The integrated GSM module allows you to control your Optimow with your phone

Optimow – The obvious choice

No need to compare features and prices. Enjoy the Optimow and the exceptional value it provides, plus a whole range of integrated features you'll pay a lot more for elsewhere.

Enjoy total control
Status, settings, GPS for positioning and theft protection, security and updates – the integrated GSM module allows you to control your Optimow with your phone*.

Peace and quiet
Let the Optimow work for you around the clock: The Optimow is so quiet, you can use it at any time, even at night, without disturbing your neighbours.

Perfect protection and easy cleaning
Unlike many other devices, the Optimow is equipped with IPX-5 splash protection which protects it against water and dust from all directions. The housing can be removed quickly and easily, enabling optimized maintenance.

Made for all weathers
No need to worry about if your mower can be used in bad weather. In rain or frost, the Optimow automatically detects whether the grass can be cut or not, thanks to its
smart sensors.

Remote controlled
Whether you want to start, stop or manage your robotic mower – the Optimow can be adapted to almost any lawn and can be set intuitively via the control panel. Simply use the GreenGuide app to change the settings according to your needs.

Outstanding results
When a razor-sharp cutting system meets an intelligent mowing deck, exceptional results are guaranteed. The fine cuttings that remain on the lawn provide mulch for self-fertilization. Optimow – for a perfect lawn every day.

Maximum safety
Together with lifting and contact sensors, the quick-brake mowing deck prevents dangerous collisions. This means your loved ones can enjoy the garden safely at any time.

The versatile 24V range

Do the job easier with allround tools for DIY and gardening

This is the allround range with anything from drills and saws to hedge trimmers. All in all 25 tools for DIY and gardening, all on the same powerful battery. With 24 volt you get one cell more than most power tools, and the range also includes three products equipped with Greenworks DigiPro brushless motors. This means even more power, longer runtime, higher speeds, greater efficiency and less noise. The products are lightweight so you can enjoy the work for as long as you like.

40V String Trimmer
G40LT30

The convenient 40V range

For gardening and outdoor life

This is the everyday range that enables you to mow your lawn, trim your hedges, cut branches, clean the decking or inflate tyres and footballs. The products are lightweight and so silent you can even hear the birds singing while you're working. Six out of 21 tools use Greenworks DigiPro brushless motor technology. This means more power, longer runtime, higher speeds, greater efficiency and less noise. A 40V lawn mower could mow 400m^2 – 900m^2 with a 4Ah battery in one go. You can use the same 40V battery for all your 40V tools.

The powerful 60V range

Made for large gardens

This is the range for large, hilly gardens with products including features like cruise control and boost mode. 60V is equivalent to petrol power in green drive, and the products are lightweight and so silent you can even hear the birds singing while you're working. Nine out of eleven tools in the range use Greenworks DigiPro brushless motor technology. This means more power, longer runtime, higher speeds, greater efficiency and less noise. A 60V lawn mower could mow 750m^2 – 1300m^2 with a 4Ah battery in one go. You can use the same 60V battery for all your 60V tools.

Maybe you've never heard of us before. That's because we're the future.

Hello, nice to meet you. We are Globe Group, the people behind the Greenworks brand. We are a young company who are front-runners in a world that leaves fossil fuels and electric cords behind.

We focus on making battery-powered garden tools and power tools, as well as air compressors, pressure washers and generators.

Our HQ and production facilities are in China. Our office for Canada and the USA is in North Carolina. The EMEA office is in Sweden together with our R&D centre. Our vision is to be one of the leading companies in our industry by 2020. Enough talk. Now go enjoy our products.
