

# AI-1

STUDIO-QUALITY AUDIO INTERFACE  
& HEADPHONE AMPLIFIER

1/4" BALANCED  
LINE OUTPUTS

NEUTRIK™  
COMBO JACK  
INPUT

48V PHANTOM  
POWER

HIGH-POWER  
HEADPHONE  
AMPLIFIER

The AI-1 is a studio-grade audio interface suitable for connecting both microphones and musical instruments to a computer or tablet.

It features an ultra-low-noise preamp, a high-power headphone amplifier, and balanced line outputs. Switchable 48V phantom power facilitates the connection of condenser microphones, and zero-latency monitoring mode allows for seamless recording.

- Single channel audio interface
- 2 x 1/4" balanced line outputs
- Neutrik™ combo jack input
- 48V phantom power
