

IT-3503 Airstream– RGB gaming case

With its two 200mm ARGB fans, the IT-3503 Airstream offers decent basic equipment for every gaming PC and leaves enough room for further upgrades. The lighting is controlled either via the integrated LED switch or via the 3pin 5V RGB header connection to the motherboard.

The tempered glass side panel offers an excellent view to the built-in hardware and makes every gamer's heart beat faster. Three additional fan spaces on the back and top contribute to a well thought-out ventilation concept. The separated power supply tunnel contains also the space for 3.5" hard drives. Dust filters in the top and in the bottom of the case, which are easy to remove and clean, keep the interior of the case free of dust.
