

Delock HDMI Extender Set over Cat.6 cable 4K 30 Hz

Description

This **HDMI extender set** by Delock can transmit high-resolution video / audio signals and an IR control signal over a single **network cable**. At **4K 30 Hz** resolution, distances of **up to 40 m** are possible, and at 1080p resolution, 70 m can be achieved. The set has wide applications in conference rooms, for tele-education or on large screens.

HDMI loop output

The transmitter has an HDMI loop output, so the signal can be **cascaded** to the next extender or to a monitor.

Power over Cable (PoC)

The set supports Power over Cable (PoC), so only the transmitter requires a power supply. The receiver is **powered via the network cable** and can therefore be used more flexible.

Screwable DC connection

The power supply with screwable connector ensures a secure and reliable connection - perfect **for professional installations** to avoid accidental disconnection.
