

MPN: MPK302

RJ45-2xRJ45, F/F

The MicroConnect MPK302 RJ45 Ethernet Y-Adapter allows you to split a single RJ45 connection into two, offering a convenient solution for temporary setups or testing environments. This adapter provides versatility when you need to connect two devices to a single network port, saving you the hassle of rerouting cables or installing additional network points. While it allows for physical splitting, please note that simultaneous use of both connections may be limited by network bandwidth. Built with quality materials and designed to MicroConnect's European standards, this Y-adapter ensures a reliable connection for your networking needs. As a leading supplier with over 20 years of experience, MicroConnect provides innovative connectivity solutions at fair prices.
