

XPG VALOR AIR COMPACT MID-TOWER CHASSIS

XPG VALOR AIR is a compact mid-tower ATX chassis with Streamline-Carving front panel design and a 3mm-tempered glass side panel. XPG VALOR AIR is available in black and white colors and comes with 4x pre-installed 120mm fans out of the box. Internal layout is mechanically engineered to ensure compatibility with most common components and has maximized flexibility for support. Fitting up to 305mm length graphic cards and up to 166mm height CPU air coolers, XPG VALOR AIR offers more than most compact-size chassis.

COMPACT DIMENSION with x4 120mm FANS PRE-INSTALLED

XPG VALOR AIR is a compact ATX mid-tower chassis with Streamline-Carving front panel design. Magnetic front panel and filter are both detachable, convenient for quick cleaning. 3mm-tempered glass side panel serves as a way to enjoy gazing through the tempered glass for looks.

MAGNETIC FRONT PANEL DESIGN

XPG VALOR AIR's front panel is designed with Streamline-Carving pattern and utilizes steel material. Both front panel and dust filter are designed with magnetic and detachable for quick and convenient removal.

ATX FORM FACTOR

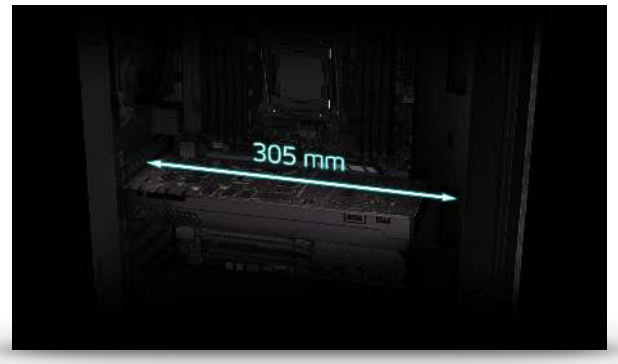

XPG VALOR AIR supports Mini-ITX, Micro-ATX and ATX form-factor motherboards.

EFFICIENT COOLING DESIGN

XPG VALOR AIR sports a sleek, clean look with a streamlined design that enhances cool air from outside to be drawn in via x3 pre-installed 120mm fans at the front, and a 120mm fan at the rear to exhaust the heat.

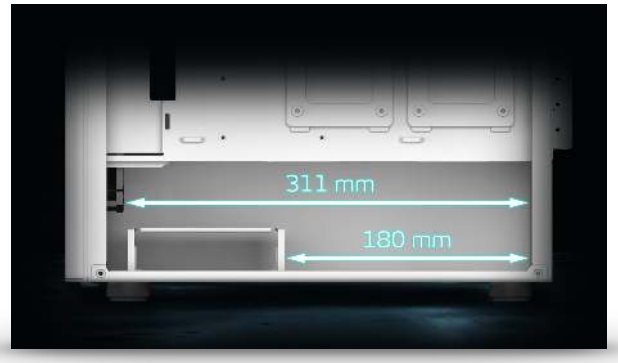

COMPATIBILITY: GRAPHIC CARD SUPPORT

The compact dimension does not compromise its fundamentals in hardware compatibility when installing or selecting graphic card.

XPG VALOR AIR can install graphic card installation up to 305mm length with the fans installed at front.

COMPATIBILITY: PSU INSTALLATION LENGTH

While ideal for modern and compact PSUs from XPG, such as award-winning XPG CORE REACTOR and XPG CYBERCORE, respectively at 140mm and 160mm in length, VALOR AIR compact ATX chassis design still allows to easily slide in up to 180mm long PSUs, which translates to a lot of space still available for cable management. HDD/SSD cage is also removable, providing additional space that can reach up to 311mm.

VERSATILE I/O PORTS

XPG VALOR AIR offers an array of I/O ports such as two high-speed USB 3.2 Gen 1 and a 3.5mm audio/ mic combo jack.

HDD/SSD STORAGE

Two removable 2.5” HDD/SSD plates for easier mounting or replacement.

Users can also install a HDD cage to add either two 3.5" or a 2.5 plus a 3.5" drive underneath the front side of the PSU shroud. The HDD cage is provided as an accessory when unboxing XPG VALOR AIR, as a flexible option for users to choose from when install storage.

XPG VALOR AIR: FEATURES

- Mainstream ATX form factor: easy to upgrade with great compatibility.
- Appreciate Streamline-Carving steel front panel and a 3mm-tempered glass side panel.
- Easy to detach front panel with magnetic design when cleaning dust filter.
- Incredible airflow support up to 6 fans.
- Pre-installed x4 120mm fans (non-ARGB).
- 7 PCI-e slots for user to upgrade/install.
- High Compatibility: Support up to 166mm height of CPU air coolers.
- Offer up to x2 140mm-fan installation at front, or a 360mm-radiator installation at front.
