

# Regnum 400 Air

PC CASE

ENDORFY

## Keep it cool

The Endorfy Regnum 400 Air is the home your components deserve — a proper mansion. It's spacious, but without overwhelming your room (472×442×220 mm) and can easily house everything you need for work and more.

### Stratus 120 PWM fans

Includes 4 powerful and durable Stratus fans with PWM speed control, co-developed with Synergy Cooling.

### Tempered glass side

Transparent side panel puts your hardware in the spotlight.

### Ample internal space

Spacious interior fits extra-long video cards and power supplies, even with front-mounted water cooling radiators.

### High airflow design

Fit up to four 140 mm and one 120 mm fan – or seven 120 mm fans – to supply powerful builds with sufficient airflow.

### Multi-radiator capacity

Enough room for large radiators up to 360 mm on the front side and up to 280 mm in the roof of the case.

### Airy and accessible front

Mesh filter in a magnetic frame lets in cold air and comes off easily for cleaning or to give access to front fans.

### Convenient cable management

Deep cable channel in front of the case gives ample room for routing cables.
