

Quick Tester

Handy banknote test-pen

- Portable & simple protection against false money
- Checks reliably all currencies made of banknote paper such as Euros, US Dollars, Swiss francs & partly British pounds

The high quality of colour copier and commercial printer, of this days, makes that less „professional“ money-faker can produce bluffing authentic banknotes. Great fakes can be produced on normal papers which are so authentic that you can see the differences hardly. The EURO Quick Tester gives you simple and portable protection.

FUNCTIONALITY:

1) Mark with the pen a banknote, at best on a bright place on the edge.

2) Wait a moment:

- **Real money**
 - The mark is fading and goes to a light yellow. Later, the mark is not to see anymore.
- **False money**
 - The mark is very dark and clearly to see.

Technical background:

For the production of Banknotes is a very special paper used. The pen recognized this paper through a special compounded ink. False money is printed very often on “normal” paper so that a very big difference is to see.
