Before Use

Please read this manual carefully before using this product. Keep this manual at hand for immediate reference whenever necessary. For details about the functions and operation procedure of this product and software, refer to *Technical Reference Guide*.

Safety Precautions

The symbols shown below are used in this manual in order to ensure safety and proper use of this product and to prevent danger to customers and other persons, and property damage. The symbols indicate the precaution levels as described below. Be sure that you completely understand their meaning before reading this manual.

WARNING:

Handling the product improperly by ignoring this symbol can lead to death or serious injury.

CAUTION:

Handling the product improperly by ignoring this symbol can lead to injury and property damage.

Notes:

Indicates supplementary notes and other useful information.

Cautions on Installation

CAUTION:

- ☐ Do not install/store the product in an unstable location or in a location subject to vibration from other devices. Equipment may fall or collapse, causing breakage and possible injury.
- ☐ Do not install the product in a location exposed to oily smoke or dust, or in a humid location. Doing so may cause electric shock or fire.
- ☐ Place this product near a wall outlet where the plug can be easily unplugged.
- ☐ Use this product in the environment described in this manual. Failure to do so may damage the product or cause injuries. (🔗 ["Specification" on page 33](#))

Cautions on Power Supply

WARNING:

- ☐ **Be sure to use the specified AC adapter. Connection to an improper power source may cause fire.**
(🔗 ["Specification" on page 33](#))
- ☐ **Do not allow dust or foreign materials to adhere to the power plug. Accumulated dust or foreign material may cause electric shock or fire.**
- ☐ **Insert the power plug securely into the socket. Failure to insert the plug securely may cause electric shock or fire.**
- ☐ **For the power cable, use either the included one or a designated one that meets the relevant safety standards of the area where you plan to use it.**
- ☐ **Do not use it for any device other than the designated device.**

- ❑ **Do not use a damaged power cable. Doing so may cause electric shock or fire. Contact qualified service personnel for advice if the power cable is damaged. Observe the following points so as not to damage the power cable:**
 - Do not modify the power cable.
 - Do not place heavy objects on the power cable.
 - Do not forcibly bend, twist or pull the power cable.
 - Do not locate the power plug near a heating device.
- ❑ **Do not hold the power plug with a wet hand. Doing so may cause electric shock.**
- ❑ **Do not connect too many power cables to one outlet. Doing so may cause fire.**
- ❑ **Disconnect the power plug from the outlet on a periodical basis, and clean the areas around and between the blades. Leaving the power plug connected to the outlet for a long period of time may cause dust to accumulate on the blade root, resulting in a short-circuit or fire.**
- ❑ **Hold the plug and do not pull the cable when disconnecting the power plug from the outlet. Pulling the cable may damage the cable or deform the plug, causing electric shock or fire.**

CAUTION:

- ❑ To ensure safety, unplug this product before leaving it unused for an extended period.

Cautions on Handling

WARNING:

- ❑ **Do not use this product in a location with volatile substances such as alcohol or paint thinner, or near fire. Doing so may cause electric shock or fire.**
- ❑ **Shut down the product immediately if it produces smoke, a strange odor, or unusual noise. Continued use may cause electric shock or fire. Immediately unplug the product when a fault or other problem occurs, and contact qualified service personnel.**
- ❑ **Shut down the product immediately if water or other liquid spills into this product. Continued use may cause electric shock or fire. Immediately unplug the product and contact qualified service personnel.**
- ❑ **Never disassemble or repair this product. Tampering with this product may result in injury or fire.**
- ❑ **Do not use this product in an environment where inflammable gas or explosive gas may exist. Do not use aerosol sprayers containing flammable gas inside or around this product. Doing so may cause fire.**
- ❑ **Do not connect cables in ways other than those mentioned in the manual. Doing so may cause fire.**
(🔗 ["Connecting the AC Adapter" on page 12](#), ["Connecting the Interface Cable" on page 16](#))
- ❑ **Do not connect a telephone line to the drawer kick connector or the DM-D connector; otherwise the printer and the telephone line may be damaged.**
- ❑ **Do not connect a LAN cable to the DM-D connector; otherwise the connected device may be damaged.**
- ❑ **Do not connect a telephone line to the drawer kick connector; otherwise the printer and the telephone line may be damaged.**
- ❑ **Do not touch the areas inside the product other than those mentioned in this manual. Doing so may cause electric shock or burns.**
- ❑ **Do not insert metal or flammable materials, or allow them to fall into the product. Doing so may cause electric shock or fire.**

**CAUTION:**

- ❑ Do not allow anyone to stand or place heavy objects on top of this product. Equipment may fall or collapse, causing breakage and possible injury.
- ❑ Install the cables and optional products in the proper direction according to the proper procedures. Failure to install correctly may cause fire or injury. Follow the instructions in this manual to install them properly. (🔗 ["Connecting the AC Adapter" on page 12](#), ["Connecting the Interface Cable" on page 16](#))
- ❑ Before moving the product, shut down and unplug the product, and make sure that all the cables are disconnected. Failure to do so may damage a cable, causing electric shock or fire.
- ❑ Do not store or transport the product in a tilted, standing or upside-down position. Doing so may cause the ink to leak.

Cautions on the Ink Cartridge**CAUTION:**

- ❑ The usable ink cartridges vary depending on the product. Use an ink cartridge that matches your printer. (🔗 ["Specification" on page 33](#), ["Ink cartridge SJIC33P \(K\)" on page 34](#))
- ❑ Do not touch the IC chip on the cartridge. Doing so may cause operating/printing malfunction.
- ❑ This product uses ink cartridges equipped with an IC chip that monitors the amount of ink used by each cartridge. Cartridges are usable even if they are removed and reinstalled. However, if an ink cartridge in which little amount of ink remains is removed and reinstalled, it may not be usable. Some ink is consumed each time cartridges are installed because the product automatically checks their reliability.
- ❑ Since ink cartridges are designed to stop the operation before ink runs out completely to maintain the quality of the print head, some ink remains in the used ink cartridge.
- ❑ Ink is also consumed during head cleaning maintenance.
- ❑ Do not turn off the product or open the front cover while charging ink (① (Power) LED is flashing). Opening the cover may cause the ink to be recharged, resulting in more ink being consumed. Also, it may cause printing malfunction.
- ❑ Do not disassemble the ink cartridge. Doing so may cause ink to adhere eyes and skin.
- ❑ Do not disassemble and remodel the ink cartridge. Doing so may cause printing malfunction.
- ❑ Use of an old ink cartridge may result in reduced print quality. Use it up within six months after opening the package. The usage period for ink cartridges is printed on the packaging of individual ink cartridges.
- ❑ If ink contacts your skin, eyes, or mouth, take the following actions.
 - When it gets onto your skin, immediately wash the area with soap and water.
 - When ink gets into your eyes, immediately flush them with water. Leaving the ink as is may result in bloodshot eyes or mild inflammation. If something is wrong, immediately consult with a doctor.
 - When ink gets into your mouth, immediately spit it and consult with a doctor.
- ❑ There may be some ink around the ink supply port on the removed ink cartridge. Take care so that it does not stain the desk or other surface.
- ❑ Do not remove the ink cartridge, except when you replace it.
- ❑ Do not open the ink cartridge package until you are ready to install it in the product.
- ❑ Do not shake the ink cartridge too hard. The ink cartridge may leak if you shake it around too much or push the sides strongly.

- ❑ *Do not allow foreign objects to fall into the cartridge installation section. Doing so may cause printing malfunction. Remove any object that might have fallen into the installation section, taking care not to damage the section.*
- ❑ *When ink is charged for the first time (right after purchase), ink is consumed for filling the print head nozzle (ink discharge holes) to get ready for printing. That is why the number of the printable sheets may be fewer than for the cartridges to be installed later.*
- ❑ *Dispose the ink cartridges properly following the law or regulations of your country and area.*
- ❑ *If you turn the power off the product using the power switch, the print head is automatically capped, which prevents the ink from drying. After installing the ink cartridges, be sure to turn the power off using the power switch when you are not using the product. Do not pull out the power plug or trip the breaker while the power is on.*
- ❑ *Keep ink cartridges out of the reach of children.*
- ❑ *A cool and dark place is recommended to store ink cartridges.*
- ❑ *If the ink cartridge is stored in a cold place for a long period of time, let it warm up at least 3 hours before using it.*
- ❑ *If moving or transporting the product after the ink cartridges are installed, leave them installed during the moving or transporting process.*

About Illustrations in this Manual

Unless otherwise specified, this manual gives explanations using illustrations of the TM-J7700.

Part Names and Functions

Front Side

TM-J7200

TM-J7700

1	Roll paper cover
----------	-------------------------

Open this cover to install/replace the roll paper. (☞ ["Installing/Replacing the Roll Paper" on page 21](#))

2	Front cover
----------	--------------------

Open this cover to install/replace the ink cartridge. (☞ ["Installing/Replacing the Ink Cartridge" on page 24](#))

3	Control panel

(☞ ["Control panel" on page 7](#))

4	Power Switch
----------	---------------------

Turns the printer on/off. (☞ ["Turning On/Off" on page 20](#))

Control panel

1	Ⓢ (Power) LED
Lights up when the printer is turned on. Flashes during head cleaning and other operations such as when turning the printer on/off.	
2	! (Error) LED
Lights up when the printer is offline due to the following conditions. • The ink cartridge is not installed or requires replacement. • The roll paper has run out. • The front cover/roll paper cover is open. • During power-on initialization. • During power-off processing. • When the printer is waiting for printing or insertion of another slip to be printed while the printer is waiting for removal of a cut sheet. Off when the printer is online. Flashes when an error occurs. (🔗 "Troubleshooting" on page 31)	
3	📄 (Cut sheet) LED
Lights up when cut sheet (slip) is selected as the print sheet. Off when roll paper is selected as the print sheet. Flashes when the printer is in the cut sheet insertion or removal waiting state. (🔗 "Inserting Slip Paper" on page 23)	
4	📄 (Paper) LED
Lights up when the roll paper has run out or is near the end. (🔗 "Installing/Replacing the Roll Paper" on page 21)	
5	💧 (Ink) LED
Lights up when the ink cartridge is not installed or requires replacement. (🔗 "Installing/Replacing the Ink Cartridge" on page 24) Off when the ink cartridge is installed and there is sufficient ink. Flashes when the ink is low.	

6

 (Feed) Button

Press this button to feed the roll paper or cut sheet.

 Notes:

Paper cannot be fed using this button in the following cases:

- *The front cover/roll paper cover is open.*
- *Printer is in the slip paper insertion or removal state.*
- *When head cleaning is being performed or an error has occurred with any sheet selected.*

7

 (Cleaning) Button

Press this button for more than three seconds to perform head cleaning. ( ["Cleaning the Print Head" on page 28](#))

Input/Output Ports

1	DM-D connector For connecting the customer display.
2	Drawer kick connector For connecting a modular cable for the cash drawer.
3	Power supply connector For connecting the power cable.
4	USB Type B port For connecting a USB cable for connecting to a computer.
5	Ethernet connector For connecting a LAN cable.

Setup

Removing the Protective Materials and Tape

Protective materials and tape are applied for protection against impacts during transportation. Remove them before installation.

 Notes:

The Protective materials and packaging box will be required for future transportation. Keep them in a safe place.

TM-J7200

TM-J7700

Installing the Printer

Install this product in a location as follows:

- ❑ On an area larger than the bottom surface of the product.
- ❑ In a location free of vibration and impacts.
- ❑ In a location that is firm, stable, and horizontal.
- ❑ In a location where a dedicated power outlet is available.
- ❑ In a location where you can set and remove paper without difficulty.
- ❑ In a location with sufficient space around the printer to allow for installation of accessories, replacement of consumable products, and daily cleaning.
- ❑ In a location that meets the conditions listed in the specifications. (📖 "Specification" on page 33)

Connecting the AC Adapter

WARNING:

Be sure to use the specified AC adapter [PS-180 (model: M159E)]. Connection to an improper power source may lead to equipment damage, fire, or electric shock.

Connect the AC Adapter by following the procedure below.

For the TM-J7700, you can connect an AC adapter to the underside of the printer. Follow the instructions to install it properly. (🔗 ["To install the AC Adapter \(only for the TM-J7700\)" on page 13](#))

1. Confirm that the power switch is off.
2. Firmly insert the DC connector of the AC adapter into the DC-in ("24V") connector of the printer.
3. Firmly insert the AC cable connector into the AC port of the AC adapter.
4. Firmly insert the plug into a grounded wall outlet.
5. Set the AC adapter so that its label side is facing down.

To install the AC Adapter (only for the TM-J7700)

Follow the procedure below to install the AC Adapter.

Notes:

Perform the following when installing the AC adapter.

- Be sure to use a dedicated AC adapter [PS-180 (model: M159E)].
- Install the AC adapter so that its label can still be seen after it is attached.
- Use a straight plug for the AC inlet side of the power cable. If you do use an L-shaped plug, install the printer near the power outlet and be sure that the plug can be easily disconnected.
- Be sure to thoroughly read and understand the information on the label of the AC adapter (rating, Warning/ Cautions) before installing it to the printer unit.

1. Turn the printer over.
2. Bundle the DC cable of the AC adapter as shown in the illustration.
The dimensions show are approximate and for use only as a rough guide.

3. Set the bundled part of the DC cable into the empty space inside the printer indicated by the circle. Insert the DC cable next to the two posts on the bottom of the printer to securely store the adapter.

4. Place the AC adapter into the printer with the label side facing up.

5. Align the depressions on the power source fixing plate with the hook protrusions on the main unit and gently push the plate to install.

6. Use the included screws (× 2) to attach the fixing plate.

7. Connect the DC cable of the AC adapter to the power supply connector ("24V") and connect the AC cable to the AC adapter.

8. Turn the printer right side up and connect the AC cable plug to a power outlet.

Connecting the Interface Cable

Connect the interface cable to be used to the connector on the rear side of the printer.

(🔗 ["Input/Output Ports" on page 9](#))

Connect the cable to be used to either the USB type-B connector or Ethernet connector.

CAUTION:

When using a USB cable, pass the cable through the wire saddle to prevent accidental disconnection.

TM-J7200

Wire saddle

TM-J7700

Wire saddle

Attaching the Power Switch Cover

Attach the power switch cover to prevent accidental operation of the power switch. Insert a sharp-pointed object into one of the holes on the power switch cover to turn the power on or off accordingly. Use a sharp-pointed object to detach the cover.

WARNING:

Unplug the product immediately if an accident occurs with the power switch cover attached. Continued use may cause fire or shock.

Install the cover as shown in the illustration below.

Changing the Roll Paper Width

You can move the roll paper guide installed in the printer to adjust for use with any of the following four paper widths: 57.5/69.5/76/82.5 mm {2.26/2.74/2.99/3.25"}. The default setting is 76 mm {2.99"}. Follow the procedure below to change the paper width.

CAUTION:

- ☐ Do not change to wider paper width after using a narrower paper width. The autocutter blade may be worn and may not be able to cut cleanly.
- ☐ When changing the paper width, be sure to change the setting for the paper width by using the utility software for the TM-J7200/TM-J7700.

1. Make sure the printer is turned off.
2. Open the roll paper cover by pressing the cover open button.
3. Remove the screw holding the roll paper guide located on the left side of the roll paper holder.

4. Change the location of the roll paper guide to match the paper width you want to use. Align the upper and lower grooves, and confirm that the protrusion is inserted in the hole on the bottom.

5. Use the removed screw to affix the roll paper guide.

Turning On/Off

Turning On

Press the power switch on the side with the (⏻) mark.

The ⏻ (Power) LED lights up and the power turns on.

Turning Off

CAUTION:

Do not turn off the printer when the ⏻ (Power) LED is flashing.

Press the power switch on the side with the (⏻) mark.

⏻ (Power) LED turns off and the power turns off.

Installing/Replacing the Roll Paper

CAUTION:

-  Be sure to use roll paper that meets the specifications.
-  Do not use thermal paper.
-  Be careful not to insert your fingers into the paper exit. The cutter blade is installed inside the paper exit and you might be injured.

Notes:

Do not open the roll paper cover during printing or paper feeding.

Follow the procedure below to install or replace paper:

1. Make sure the printer is turned on. ( ["Turning On/Off" on page 20](#))
2. Open the roll paper cover by pressing the cover open button.

3. Remove the used roll paper core if there is one.
4. Put the roll paper inside the printer in the correct direction as shown in the illustration below.

5. Before closing the cover, pull out the leading edge of the roll paper and align the mark as shown in the illustration below.

6. Close the roll paper cover.
The printer will automatically feed the roll paper to remove any slack in the paper.

Inserting Slip Paper

Notes:

- Be sure the paper is flat, without curls, folds, or wrinkles.
- Use only single sheet paper. Do not insert any multiple sheet paper, as this may cause a paper jam.
- Pressure sensitive copy paper cannot be used because the printer is an inkjet printer.
- Roll paper must be installed evenly for printing on slip paper in order to prevent paper jams.

Follow the procedure below to insert slip paper:

1. Make sure the printer is turned on.
2. Set the paper so that the right edge of the paper contacts the paper guide on the right and insert the slip paper. Refer to the label affixed to the printer.

TM-J7200

TM-J7700

Installing/Replacing the Ink Cartridge

CAUTION:

Read the handling instructions carefully before installing the ink cartridge.

( "Cautions on the Ink Cartridge" on page 4, "Ink cartridge SJIC33P (K)" on page 34)

Install/Replace the ink cartridge by following the procedure below.

1. Make sure the printer is turned on. ( "Turning On/Off" on page 20)
2. Make sure the  (Ink) LED is on or flashing.
3. Pull the handle to open the front cover

4. During replacement, remove the used ink cartridge.

CAUTION:

Do not put your fingers inside the ink cartridge compartment or you may be injured by a sharp or protruding part.

5. Shake the ink cartridge package three or four times before opening it.

6. Insert a new ink cartridge from the top and push it firmly but gently until it clicks into place.

7. Push down the tab in the direction of the arrow before closing the front cover.

8. Close the front cover.

The  (Ink) LED will now turn off.

When the ink cartridge is installed for the first time, the  (Power) LED flashes and initial ink charging starts.

 Notes:

The ink cartridge included in the product package is used for initial ink charging. The printer uses ink to prepare for printing when the ink cartridge is installed for the first time.

It takes at least two minutes to charge ink. The ink charging time varies depending on the conditions.

 CAUTION:

Never open any cover on the printer or turn off the printer during ink charging (while the  (Power) LED is flashing). Doing so during ink charging will consume a large amount of ink, which may require replacement of the ink cartridge before completion of charging.

When ink charging completes, the  (Power) LED changes from flashing to on.

Perform a test print to check if printing is performed properly. ( ["Test Printing" on page 27](#))

Maintenance

Cleaning the Printer Case

Be sure to turn off the printer, and wipe the dirt off the printer case with a dry cloth or a damp cloth.

CAUTION:

Never clean the product with alcohol, benzine, thinner, or other such solvents. Doing so may damage or break the parts made of plastic and rubber.

Cleaning the Print Head

Perform head cleaning if the print result is not normal as shown in the illustration below.

CAUTION:

- ❑ Head cleaning takes one to two minutes. Do not open any cover or turn the power off during head cleaning.
- ❑ Do not press the (Cleaning) button unless there is a problem with print quality. Unnecessary head cleaning will waste ink.

Follow the procedure below to perform head cleaning.

1. Make sure the printer is turned on. ("Turning On/Off" on page 20)
2. Press the (Cleaning) button more than 3 seconds.

The (Power) LED flashes and head cleaning begins.

When head cleaning is complete, the (Power) LED turns off and the printer can perform normal printing.

Perform a test print to check if printing is performed properly. ("Test Printing" on page 27)

Message for Replacing Maintenance Parts

The following message will be printed every time the printer is turned on when a maintenance part (pump unit, ink supply unit, or waste liquid absorber) is near the end of its service life. Please follow the instructions in the message.

Caution:

A maintenance part must be replaced.

Contact qualified service personnel.

Transporting

Follow the procedure below to transport this printer.

1. Remove the roll paper.

 Notes:

Leave the ink cartridge in the printer. Transporting the printer with the ink cartridge removed can result in dot dropout or ink adhering to the inside of the case.

2. Turn off the printer.
3. Check that the  (Power) LED is off.
4. Disconnect the power cable and all other cables.
5. Attach the protective materials and affix tape as shown in the figure below.

TM-J7200

TM-J7700

6. Wrap the printer with protective cushioning material to prevent any impacts during transport. Keep the printer upright and horizontal while packing and transporting it.

Notes:

Reshipping it can result in dot dropout. Perform head cleaning if dot dropout occurs. (☞ "Cleaning the Print Head" on page 28)

Troubleshooting

! (Error) LED is flashing or lit

- ☐ Check whether a paper jam has occurred. Remove any jammed paper. (🔗 ["Removing Jammed Paper" on page 31](#))
- ☐ Check whether the front cover/roll paper cover is closed. Close the cover if open. (🔗 ["Front Side" on page 6](#))
- ☐ Turn off the power, wait several seconds, and then turn it on again. If the error remains, contact qualified service personnel.

Removing Jammed Paper

When a paper jam occurs, never pull out the paper forcibly. Open the cover and remove the jammed paper.

For roll paper:

1. Open the roll paper cover.
2. Remove the paper causing the paper jam.

3. Set the roll paper again and close the cover.

For cut sheets:

1. Open the front cover.
2. Remove the paper causing the paper jam.

3. Close the front cover.

*: According to Epson's operating conditions

Consumable Products

Ink cartridge SJIC33P (K)

Ink cartridge specialized for this printer.

Genuine Ink Cartridge Recommended

- ❑ For the best performance of the printer, it is recommended to use genuine Epson ink cartridges. Use of non-genuine Epson ink cartridges can adversely affect the printing quality and prevent the printer from realizing its maximum performance. Epson cannot guarantee the quality and reliability of non-genuine Epson products. Repairs for any damage or breakdown of this product due to the use of non-genuine Epson products will not be free of charge even if the warranty period is still valid.
- ❑ Color adjustment of the product is based on the use of genuine Epson ink cartridges. Use of non-genuine ink cartridges may result in reduced print quality. Epson recommends the use of genuine Epson ink cartridges.

Restriction of Use

When this product is used for applications requiring high reliability/safety such as transportation devices related to aviation, rail, marine, automotive etc.; disaster prevention devices; various safety devices etc.; or functional/precision devices etc., you should use this product only after giving consideration to including fail-safes and redundancies into your design to maintain safety and total system reliability. Because this product was not intended for use in applications requiring extremely high reliability/safety such as aerospace equipment, main communication equipment, nuclear power control equipment, or medical equipment related to direct medical care etc., please make your own judgment on this product's suitability after a full evaluation.
