

Alphacool article number: 24832

The Alphacool fan box is ideal for setting up a NexXoS Nova 1080mm radiator, including 120mm fans, externally. The included plastic feet can be easily mounted on the fan box, which can then be placed on the floor, table or any other location. The grid structure at the front and rear of the box protects the fans, as well as the cooling fins of the radiator, from damage caused by entry of foreign objects and provides safety for enquiring fingers!

Alphacool NexXoS Nova 1080mm fan housing

- Stable
- Clear design & clean look
- Protects fan & radiator against damage

Scope of delivery

1 x Alphacool NexXoS Nova 1080 mm fan box, black
4 x stand
16 x screws/nuts for stand mounting
12 x screws for fan mounting
1 x allen key

Technical data

L x W x H	374 x 395 x 87 mm
Material	steel, plastic
Compatibility	NexXoS XT 45 Full Copper 1080mm Nova radiator + fan with max. 25mm thickness
Weight	2.26 kg (incl. mounting accessories)
Colour	black

Article text

The Alphacool fan box is ideal for setting up a NexXoS Nova 1080mm radiator, including 120mm fans, externally. The included plastic feet can be easily mounted on the fan box, which can then be placed on the floor, table or any other location. The grid structure at the front and rear of the box protects the fans, as well as the cooling fins of the radiator, from damage caused by entry of foreign objects and provides safety for enquiring fingers!

Clean look

The NexXoS Nova 1080mm radiator is mounted with a maximum of 9x 120mm fans (max. thickness $\leq 25\text{mm}$) inside the fan box. Sufficient inlets and outlets guarantee clean routing of all cables. The technical construction and the "Air-Flow" optimised design of the fan box ensure a clean look for your PC cooling requirements.

Stable

The 4 plastic feet can be attached to the base of the fan box in many different positions. This means that the fan box always has a secure and stable position.
