

# WIRELESS ME™

COMPACT WIRELESS MICROPHONE SYSTEM

2 WAY  
INTERVIEW

WORKS WITH  
CAMERAS AND  
SMARTPHONES

FREE RØDE VIDEO  
AND AUDIO APPS

The Wireless ME is an ultra-compact wireless microphone system that makes recording professional audio for your videos effortless. Simply clip it onto your talent or yourself to be recording crystal-clear wireless audio in seconds. Works with cameras, computers and smartphones, and is compatible with all social media apps, including Instagram and TikTok. Also compatible with free RØDE video and audio apps, including the new RØDE Capture iOS camera app for dual-camera video recording. Features microphones built into both the transmitter and receiver for recording everything from two-way interviews to reaction videos, with GainAssist technology ensuring your audio is perfect every time.

- Ultra-compact and easy-to-use wireless microphone system
- RØDE's state-of-the-art Series IV 2.4 GHz digital transmission for crystal-clear recording with over 100m range
- Intelligent GainAssist technology automatically controls audio levels for perfectly clear sound in any application
- Broadcast-grade microphones built into both the transmitter and receiver for versatile dual-channel recording
- Ability to connect an additional transmitter for capturing three microphones simultaneously
- Connects seamlessly to cameras, smartphones and tablets (iOS and Android), and computers (Mac and Windows) with all required cables included
- Compatible with all RØDE Series IV Wireless Systems
- Easy control over settings via RØDE Central; compatible with RØDE Connect, RØDE Reporter and the new RØDE Capture app
- Designed and made in RØDE's precision facilities in Sydney, Australia

## ACOUSTIC & ELECTRICAL SPECIFICATIONS

|                                         |                                                                   |
|-----------------------------------------|-------------------------------------------------------------------|
| Acoustic Principle:                     | Pre-polarised pressure transducer                                 |
| Polar Pattern:                          | Omnidirectional                                                   |
| Frequency Range:                        | 20 Hz – 20 kHz                                                    |
| Dynamic Range:                          | 100dB                                                             |
| Max SPL:                                | 122dB SPL                                                         |
| Equivalent Noise (dBA):                 | 22dBA                                                             |
| Analog Inputs:                          | TRS (lavalier microphone Input)                                   |
| Output Connection:                      | 3.5mm TRS<br>USB-C                                                |
| Computer Connectivity:                  | USB-C                                                             |
| Bit Depth:                              | 24-bit                                                            |
| Sample Rate:                            | 48 kHz                                                            |
| Minimum Operating Systems Requirements: | macOS 10.15 above<br>Windows 10 and above<br>iOS 14<br>Android 11 |
| Power Requirements:                     | In-built rechargeable lithium-ion battery charged via 5V USB      |
| Operating Time:                         | 7 hours                                                           |
| Transmission Range:                     | >100m (line of sight)                                             |
